

NEWSLETTER

October, 2019 ~ March, 2020

President's Report:-

Hi everyone,

I hope this newsletter finds you all well.

I managed to catch up with a few of our members at the cars 'n coffee run at the Farmers Arms Hotel, Beeac a couple of Sundays ago and had the most enjoyable morning. It is the first I have been able to get to for a while and it was great to be able to relax and pass the time of day with friendly faces. If you haven't had the chance to get to this regular monthly run, make sure you put it on the 'to do' list as it is definitely worth the effort.

Last Saturday, I was lucky enough to have the day off and I jumped on the train with my son and headed up to Melbourne to check out Motorclassica at the Melbourne Exhibition Buildings. Expensive, but what a great show. There were cars and motor bikes from all over Australia. Every vehicle was pristine, and yes, I was continually jealous. At car shows that I have previously attended, you normally see everything in an hour or so of wandering around, but we spent the whole day at Motorclassica and probably didn't see it all.

On the weekend 26th and 27th October, it is Camperdown's "Rock the Clock Festival".

Hopefully a number of our Club members will get a chance to attend the Festival.

I am heading to the Triumph TR Register Concourse display on the 26th October at Lake Wendouree in Ballarat. If you happen to be up that way please drop in and say hello. It would be great to see you.

We have received a letter from the Colac Otway L2P Driver Training program asking for assistance of volunteers to mentor some learner drivers. This is a program that has now been going for over four years and helped a large number of our local kids get the driving experience and driving hours they need to successfully obtain their driver's licence. It is worthy to note that volunteers do not have to teach the learners if they are complete novices. Each student must first undertake paid lessons with a professional driving instructor and ticked off for being considered as safe to drive on our roads before they can enter the program. So if you do have some spare time and would like to volunteer some time to this terrific program, please contact Nathan. Further details are in this Newsletter.

I hope you all get a chance to get out and about and enjoy your cars, but above all else, please stay safe.

Happy motoring, Ken (President)

DO IT YOURSELF CAR SAFETY

This is a timely message from the Australian Competition and Consumer Commission (ACCC) on Do It Yourself car maintenance safety. The article was found in the August edition of the "ALVIC" – the Alvis Car Club of Victoria Newsletter.

When working on cars at your home or at a workshop, remember that safety is the number one priority for yourself and for others. Around 120 Australians have died as a result of do it yourself (DIY) car maintenance accidents since 2000, while many hundreds have been hospitalised due to injuries. The ACCC is warning consumers to take extra care when repairing their vehicles. Research shows most fatalities happen when the victims are working under a vehicle and using equipment incorrectly, with many of the fatalities involving the use of vehicle jacks. Most of the fatalities were men and involved the vehicle being lifted or supported in the wrong way. Most victims were aged 40 to 49. Many of the DIY activities also involved fuel tanks or fuel lines and the use of power tools, increasing the potential risks.

Injuries range from amputation to fractures and crush injuries. Know the risks and protect yourself, your friends, family and workmates. Safety tips:-

- never get under a car that is only supported by a jack;
- when working under your car, use a trolley jack to lift the car before lowering it onto vehicle support stands;
- use vehicle support stands on a hard surface before working under your car.
- never place any part of your body under a vehicle unless it is sitting securely on support stands or ramps;
- never allow a person or pet to remain in the vehicle while it is being jacked;
- never exceed the weight capacity of the jack;
- always perform vehicle maintenance on steady ground, not on sand or a sloped surface;
- never use makeshift support stands such as blocks of wood or bricks;
- apply the handbrake;
- always chock the wheels on a raised vehicle;
- follow product instructions and report faulty products.

The ACCC has also spoken with Robinette Emonson, whose husband died after being crushed by his car while working in his garage. Despite suffering this tragic loss, Robinette has shared her story to help raise awareness, and share an important message with others.

The ACCC has produced a new video explaining the correct procedure for common DIY car maintenance tasks to help car enthusiasts safely repair their vehicles and avoid the common unsafe practices with DIY repairs. "We want to get the message out that people should never get under a vehicle supported only by a jack, they should always use support stands or ramps, and chocks."

To view the video and Robinette Emonson's interview, go to the following website.

rate area to our Triumph Sidescreens (being Judged)

Subject to Weather & Ground Conditions
Contact John Johnson on M. 0419 88 00 75 to confirm attendee numbers & weather conditions.

FEDERATION PICNIC : MARONG

My daughter and I attended the Federation Picnic at Marong on Sunday, 25th August. My daughter is a nurse, and as she would be working the following weekend, attending the Federation of Veteran, Vintage and Classic Vehicle Clubs of Victoria's Marong Picnic with me was her Father's Day gift to me.

I collected my daughter from Geelong and we headed to Bendigo with my 1925 15/30 Crossley on the trailer behind. (I wanted to be home at a reasonable hour so trailering was a better option). We parked the Patrol and trailer at the Bendigo Car Club rooms (and I was most grateful to them for that) and drove from there to Marong. We parked the Crossley on the oval next to a very nice Comer truck, bought some lunch from the Rotary Club stall and proceeded to have a walk around. The weather was not too bad; a bit of wind, bit of cloud but nice sunshine. Luckily no rain (there was some on the way home).

There were a great range of vehicles on display, from veterans, vintages & classics with a couple of tractors, trucks and buses. Not one make or model was dominate. The earliest vehicle I saw was a 1913 T H Schneider and my favourite vehicle was a 1951 Bedford Bus (see below).

As those who have previously attend Federation Picnics, on arrival you are given a raffle ticket. Because there had been mention of rain heading our way; it was raining in Maryborough, the raffle was drawn a bit earlier than 2.00pm. Many prizes were drawn and numbers were very close to mine, 1 or 2 off but no luck there, or maybe I was lucky as if I had won some of the car care products, I might have had to wash some cars!!!!!! While some went home after the raffle draw, many people stayed and a good day was had by everyone.

Shane Perrott

TAC COLAC OTWAY L2P LEARNER DRIVER PROGRAM

Community Hub Inc. as a non for profit organisation has been proud to deliver the TAC Colac Otway L2P Learner Driver Program since 2013. The TAC Colac Otway L2P Learner Driver Program is a volunteer-based program that provides assistance to learner drivers that don't have the resources to achieve the 120 mandatory hours of driving experience required to obtain a probationary licence.

The TAC Colac Otway L2P Learner Driver Program supports young people to address transport barriers in order to improve pathways to employment and further education within the community. In a rural locality, access to transport is particularly important for community members to engage with services.

To date the TAC Colac Otway L2P Learner Driver Program has supported 58 Learner Drivers to work toward and obtain their probationary licence. Community Hub Inc. has recently celebrated the success in obtaining an additional 4 years of funding for the TAC Colac Otway L2P Learner Driver Program as well as acknowledge the enormous contribution of the current volunteer mentors.

The TAC Colac Otway L2P Learner Driver Program requires support from local volunteers who are interested in supporting these learner drivers. Learner drivers would not enjoy the benefits of this program without the commitment from our valued volunteers.

To become a TAC Colac Otway L2P Learner Driver volunteer mentor all you need is;

- A full Victorian driver's licence
- A minimum commitment of 1 hour per week
- Enthusiasm to support a young person (16-24 years old)
- Pass a Police check, a licence check and a Working With Children check
- Complete TAC Colac Otway L2P Learner Driver Program training prior to starting

What else do you need to know?

Before entering the TAC Colac Otway L2P Learner Driver Program each learner driver undertakes paid lessons with a professional driving instructor and be deemed safe to drive on the road.

Learner drivers will also undertake paid lessons with a professional driving instructor as required throughout the program. This ensures that the volunteer mentor is not responsible for providing instruction and rather there to support the learner driver to achieve the hours they require to obtain their probationary licence.

Volunteer mentors will be required to participate in mentor training and will have the opportunity to attend quarterly meeting with other mentors to receive program updates and celebrate achievements.

Program Coordinator Contact Details:

Nathan Barnden, 34 Connor Street Colac. Ph. 0490 040 078

The **Jowett Javelin** was an **executive car** which was produced from 1947 to 1953 by **Jowett Cars Ltd** of **Idle**, near **Bradford** in England. The model went through five variants coded PA to PE, each having a standard and "de luxe" option. Designed by **Gerald Palmer** during **World War II**, it was intended to be a major leap forward from the relatively staid designs of pre-war Jowetts. Just over 23,000 units were produced.

These Jowett's from Victoria, NSW and South Australia were recently spotted visiting Portland.

CALENDAR OF EVENTS – OCTOBER, 2019 to MARCH, 2020

2019
